BEARD COMB SHAPER

HOW TO USE Front of Neck

After you have shaved each side of the neck to form your lines, you will have a V shape left in the front. Simply shave off the V and you will have your perfect neck line. You can check it with the curvature shown in the illustration by lining each end up with parts.

Shaping the Goatee

Place The Beard Shaper into the position of the diagram, Once you have the tool into position, simply shave over the outer edge of the tool. This works best when you have a minimal amount of hair on the cheeks if you are using a razor. You can use clipper to achieve this as well if you have long hair to cut. Repeat this action on the other side to get a nice looking goatee.
